## Overview

### Archeologist

Archeologists research the materials and records of past cultures, countries, tribes, and early prehistoric man in order to reconstruct and understand their origin and development. They excavate, analyze, classify and interpret artifacts and weapons to identify trends.

Graduates with a master's degree in archeology can qualify for a teaching position in two-year colleges, while a Ph.D. is usually the minimum requirement for most teaching positions in 4-year colleges. Training in statistics is essential for those who wish to find research positions in government agencies or in social science research institutes.

USE FOCUS 2

MAKE INFORMED CAREER DECISIONS

Remember, career planning involves thinking about which educational and occupational paths will provide you with satisfaction and self-fulfillment in all aspects of your life, not only in the present, but in the future.

# Career Development Process\*

1. Experimenting through work sampling, volunteering, or employment,
2. Creating awareness of options,
3. Exploring possible career pathways,
4. Reviewing available information,
5. Clarifying interests, values, and skills through assessment,
6. Reflecting upon experiences,
7. Relating education and training options to occupational goals,
8. Consulting with knowledgeable people in the field of interest,
9. Formulating plans for education, training, career entry, and retraining,
10. Making decisions and refining plans,
11. Implementing and adapting plans, and
12. Applying the career development process throughout the lifespan.
