HEALTH SERVICES
120 BLOOMFIELD AVENUE
CALDWELL, NJ 07006-6195
(973) 618-3319
http://www.caldwell.edu

Dear Adult Undergraduate/Graduate Student,

The Health Services Department welcomes you to the Caldwell University Community.

New Jersey State Law mandates immunization requirements for college students. You must complete and submit the health form to the Health Services Department by the due date.
Forms must be uploaded to the Student Health Services portal.
Log onto Cougar Apps using your Net ID and look for this icon or use:
https://caldwell.medicatconnect.com

Please note that there are additional requirements for students residing in campus housing which can be found on the health form. Failure to complete this form in its entirety will result in a registration hold and/or campus housing hold.

Acceptable proof of immunizations:

- Caldwell University Health form completed and signed by your licensed health care professional
- Official school immunization records
- Public Health Department record

If you are unable to obtain proof of past immunization, you must be either revaccinated or provide a laboratory report showing immunity. Immunization and testing for immunity are available through your personal health care provider.

Limited exemptions are allowed for religious and medical reasons. Requests for exemptions must follow specific guidelines which can be obtained from Health Services. Medical exemptions are granted following the completion of the medical exemption form which can be requested from Health Services and completed by your physician. It is important to know that in the case of an outbreak of a communicable disease on campus, students who have been approved for exemptions will not be allowed to remain on campus or attend classes until it is deemed safe by the Department of Health.

Students born before January 1, 1957 are exempt from the Measles, Mumps, and Rubella requirement, however, **must comply with the Hepatitis B requirement** if taking 12 or more credits per semester**.**

Health information that you provide to Health Services will be treated as confidential and will not be released without your written permission or pursuant to government regulations. Immunization records must be made available upon request to state inspectors in order to comply with New Jersey law.

If you have any further questions regarding the health form, please contact Health Services at 973.618.3319.

We wish you health, happiness, and success as you pursue your academic goals.

Health Services Staff

Please Check:
☐ **Adult Undergraduate**
☐ **Graduate**
☐ **I will be taking 12 or more credits in my first semester at Caldwell University**
☐ **I will be residing in campus housing**

HEALTH FORM
Adult Undergraduate or Graduate Student

DUE DATE:	
Fall Semester Entry	**July 15th**
Spring Semester Entry	**Dec. 15th**

Please read carefully and complete **ALL** sections. Upload form and any supporting documentation to the Student Health Services Portal by due date. Incomplete forms will jeopardize admittance to class and residence halls.

PLEASE PRINT

REQUIRED IMMUNIZATIONS:

Measles, Mumps and Rubella: New Jersey State Law requires that ALL students provide documentation of two Measles, one Mumps and one Rubella vaccination **OR** copy of laboratory test results proving immunity.

MMR (two dose series): Dose #1 ____/____/____ M D Y Dose #2 ____/____/____ M D Y	**OR**	**Measles:** Dose #1 ____/____/____ M D Y **Measles:** Dose #2 ____/____/____ M D Y **Mumps:** Dose #1 ____/____/____ M D Y **Rubella:** Dose #1 ____/____/____ M D Y	**OR**	**MMR Antibodies, IgG may be submitted to prove immunity.** **A copy of the laboratory report must be attached** **Equivocal results are NOT accepted**

Hepatitis B: New Jersey State Law requires that ALL students (registered for 12 credits or more) provide documentation of Hepatitis B vaccine OR copy of laboratory test results proving immunity.

Hepatitis B (three dose series): Dose #1 ____/____/____ M D Y Dose #2 ____/____/____ M D Y Dose #3 ____/____/____ M D Y	**OR**	**Hepatitis B Surface Antibody test demonstrating immunity.** **Copy of laboratory report must be attached** **Equivocal results are NOT accepted**

Tuberculosis Testing:
US Residents: Required for students entering on-campus housing. Testing can be either an IGRA or a PPD
ALL International Students (resident on campus or commuter): Testing must be an IGRA Lab test (TB skin testing will not be accepted for international students.)
TB testing must have been performed **within 6 months** prior to entering campus housing or the start of the semester for commuters. If an IGRA is performed a copy of the lab report must be attached to this form. If TB testing is positive, a chest x-ray is mandatory and a copy of the x-ray report (dated after the positive test result) must be attached.

PPD Date Given:____/____/____ (M D Y) PPD Date Read:____/____/____ (M D Y) (must be read 48-72 hours after test) PPD Result:______mm

IGRA Test performed:____________________ Date of Lab Test______/______/______ (M D Y) Attach lab report ☐

Strongly Recommended Immunizations:

Tetanus, Diphtheria, Pertussis (T-Dap): Date: ______/______/______ (M D Y)

Varicella (Chickenpox): Dose #1 ______/______/______ (M D Y) Dose #2 ______/______/______ (M D Y)

Health Care Professionals Signature: ______________________________**Date and Office Stamp Required**

MENINGITIS INFORMATION

After reading this information, please complete the meningitis immunization form including your acknowledgement signature and vaccine information.

New Jersey State law requires that colleges provide incoming students and their parents with information about meningitis infection and available vaccinations. This information provides the most up to date scientific evidence regarding this devastating disease.

The Disease

Meningococcal meningitis is a bacterial infection that can have sudden onset and strike otherwise healthy people, it can cause permanent disability and death. Although it is rare, teens and young adults age 16-23 are at increased risk. College students who live and work in close proximity to each other are at particularly high risk. The infection can attack the lining of the brain, spinal cord and the bloodstream and cause flu like symptoms, which can make diagnosis difficult. Common symptoms are: confusion, fatigue, rash of dark purple spots, sensitivity to light, stiff neck, nausea, vomiting, headache and high fever. The rates of meningococcal disease have been declining in recent years in part to consistent vaccination. Even with the decline in cases, meningococcal meningitis continues to have a fatality rate of 10-15% so continued protection is necessary to prevent disease.

Prevention

The best way to protect yourself is to get vaccinated. Currently two different types of meningitis vaccines are available. The first vaccine protects against four strains of meningococcal bacteria known as A,C,Y,W-135 (Menactra® and Menveo®). The Advisory Committee of Immunization Practices (ACIP) recommends two doses for all adolescents. The first dose is typically given at 11 or 12 years old. Because the vaccine wanes in effectiveness a booster is recommended at age 16 so the adolescent has continued protection when they are at highest risk. This vaccine is mandatory for all students under the age of 19 at the start of the student's first semester **AND** everyone (regardless of age) living in University housing (see page 6 for more information about requirements).
A second vaccine protects against Meningitis type B. This vaccine is not mandatory for most students, however there have been outbreaks and individual cases of meningitis type B on college campuses in recent years. Teens and young adults **may** be vaccinated with the serogroup B vaccine (Bexsero® or Trumenba®). In June of 2015 the ACIP recommended that given the seriousness of meningococcal disease and the availability of a licensed vaccine, individuals are encouraged to consult with their healthcare provider regarding administration of this vaccine. Please refer to the guidelines on page 6 to determine if you are required to have a Meningitis B vaccine series.

If you have more questions regarding vaccine requirements please call Health Services at 973.618.3319. You can also visit the Center for Disease Control website at https://www.cdc.gov/meningococcal/ or American College Health Association website at https://www.acha.org/.

MENINGITIS RESPONSE FORM: MENINGOCOCCAL VACCINE REQUIREMENTS

New Jersey law requires that new students enrolling in a public or private institution of higher education in New Jersey to have received meningococcal vaccines as recommended by the Advisory Committee of Immunization Practices (ACIP). There are two types of meningococcal vaccines that might be required based on your age and your risks: the meningococcal conjugate vaccine (MenACYW) that protects against serogroups A, C, Y and W disease; and the meningococcal serogroup B vaccine (MenB) that protects against serogroup B disease.

MenACYW (Menactra® and Menveo®) vaccine is routinely recommended at ages 11-12 years with a booster at 16 years. Adolescents who receive their first dose of MenACYW vaccine on or after their 16th birthday do not need a booster dose. Additional doses may be recommended based on risk. People 19 years of age and older are not routinely required to receive the MenACYW vaccine unless they are students living in residential housing or if another risk factor applies.

MenB (Bexsero® and Trumenba®) vaccine is routinely recommended for people ages 10 years or older with high risk health conditions. People 16-23 years old (preferably at ages 16-18) may also choose to get a MenB vaccine.

INSTRUCTIONS: To assist in determining which meningococcal vaccines may be required, review each of the indications in the table below, both by age and by increased risk, with your healthcare provider. **Place a checkmark in the box next to each indication that applies to you.**

Graduate and Adult Undergraduate Students ONLY:
Form is NOT VALID if NOT signed by Student

Student Name:	Student ID Number:

My signature below affirms that I have received and reviewed the meningitis information provided by Caldwell University, I am 19 years or older, *not living on campus*, and I do not meet any of the high risk categories as stated below that would necessitate my being vaccinated against meningitis.

DOB:	Signature:	Date:

Age:	MenACYW Requirement	MenB requirement
☐ ≤ 18 years of age, not at increased risk (see below)	√ Vaccine required (administered after age 16)	Vaccine not required (but recommended)
☐ ≥ 19 years of age, not at increased risk (see below)	X Vaccine not required	X Vaccine not required
Increased Risk:	**MenACYW Requirement**	**MenB requirement**
☐ **Students living in on-campus housing (Must be administered after age 16 and within 5 years of entering campus housing)**	√ Vaccine required (administered after age 16)	X Vaccine not required
☐ Complement component deficiency or use of medication known as complement inhibitor (e.g. eculizumab)	√ Vaccine required	√ Vaccine required
☐ No spleen, or problem with spleen- including sickle cell disease	√ Vaccine required	√ Vaccine required
☐ HIV infection	√ Vaccine required	X Vaccine not required
☐ Work in a laboratory with meningococcal bacteria (Neisseria meningitis)	√ Vaccine required	√ Vaccine required

Form only needs to be signed by a healthcare provider IF vaccination information is required:

Meningococcal vaccine A,C,Y,W-135: Dose #1 (at age 11-12 yr) _____/_____/_____ (M D Y) Dose #2 (after age 16) _____/_____/_____ (M D Y)

Meningococcal B: Dose #1 _____/_____/_____ (M D Y) Dose #2 _____/_____/_____ (M D Y) Dose #3 _____/_____/_____ (M D Y)

Which one: ☐ Bexsero® ☐ Trumenba®
