

In 2015, Caldwell University's Office of Academic Assessment conducted a satisfaction survey to current business students about the quality of their education. The results were as follows:

1. 97% of students agree or strongly agree that "business faculty are knowledgeable in content areas and connect material to the contemporary world."
2. 90% of students agree or strongly agree that "business instructors are responsive when with questions about course materials or assignments."
3. 80% of students agree or strongly agree that "when sought career planning advice it was valuable."
4. 75% of students agree or strongly agree that "satisfaction with the number of times interacted with advisor."
5. 86% of students agree or strongly agree that "clearly understand academic major requirements in order to graduate."
6. 85% of students agree or strongly agree that there is a system to "easily track progress completing major requirements."
7. 74% of students agree or strongly agree that they have the "ability to get into courses required for their major without difficulty."
8. 90% of students agree or strongly agree that they are "satisfied with business education at Caldwell University."
